SCAN ME
I knew UMN Crookston was the place for me since the 8th grade when I first visited campus. It feels like family and the education I'm getting is amazing. I've been so impressed with my professors and how much they are invested in me as a person. I've also gotten so many hands-on opportunities like working in an actual high school classroom. This makes me feel ready for the real world some day!

My absolute favorite thing about UMN Crookston is the faculty and staff. You really get to know each and every one of them really well, which makes the undergraduate experience a lot easier. It was comforting to know that I could reach out, or even call them whenever I needed help. They helped prepare me for graduate school and my future career as a pharmacist.

My favorite thing about UMN Crookston is the people. Right from the start, a current student encouraged me to join a club on campus. One act of involvement started a ripple effect, leading me to a new network of people. The relationships I've made are so real and meaningful to me.

My absolute favorite thing about UMN Crookston is the faculty and staff. You really get to know each and every one of them really well, which makes the undergraduate experience a lot easier. It was comforting to know that I could reach out, or even call them whenever I needed help. They helped prepare me for graduate school and my future career as a pharmacist.

I received first hand experience in IT because I worked on campus at the Computer Help Desk. UMN Crookston is a laptop university, so everyone on campus gets a laptop. The help desk offers technology services for everyone.
