As we continue into the 21st century, there’s an increasing need to ensure the integrity of our food supply, to maintain the health of our environment, and to strengthen our agricultural economy. At the University of Minnesota Crookston, you can become a leader in the areas of agriculture and natural resources as you learn to balance environmental sustainability with the use of emerging technologies to enhance production. Explore our experiential-based programs and find out where you can make a difference. Come take a campus tour and see what we are all about for yourself!

Some golden nuggets to consider...

- Natural Resources Club
- Northwest Research & Outreach Center
- Rodeo Association Club
- The Wildlife Society (UMC Student Chapter)
- Turf Club

EXPERIENTIAL LEARNING

At the U of M Crookston, you won’t spend all your time behind a desk. Our curriculum is designed around experiential learning, which means we want you to have as much hands-on learning as possible. Depending on your major, you’ll find opportunities to be in the field, the lab, the classroom, or engaging in simulated scenarios that give you a competitive edge when you enter the workforce or head to grad school. You’ll learn the concepts and then actively apply them through projects, field trips, site visits, internships, and interactions with professionals in the field.

INTERNSHIPS

They’re a great way to earn college credit, add to your resume and help answer the question, “is this really what I want to do?” You can find internship opportunities with everyone from the business down the street to Fortune 500 companies. Or maybe grad school is in your future. U of M Crookston students get the educational requirements and resources they need to apply to an array of graduate programs from veterinary science to med school to an MBA program. Many go on for more education in a variety of other fields.

Small Campus. Big Degree.
