Academic Progress Audit System

Your APAS Report

The Academic Progress Audit System (APAS) report provides students and advisers with accurate reports on how students are meeting the requirements for the specified program of study. APAS reports are an individualized, computerized record that compares all completed and in-progress coursework (including transfer credits) with the requirements for a particular major.

Your APAS report is available on line at: <http://onestop.UMCrookston.edu/registration/>

APAS produces a report, or degree audit, that reflects your progress toward completion of an undergraduate degree in your declared or proposed major. The APAS report shows how your University of Minnesota courses, transfer courses, and courses in progress all apply to your degree requirements. It should be used as a tool to assist you and your adviser in planning your future coursework.

Why use APAS?

Here are just a few benefits of using APAS:

- Your APAS report lists your degree requirements, summarizes your progress to date, and explains what you will need to do to complete your declared degree program.
- APAS draws its information from your on-line student record; therefore, each time the report is processed you can be assured that it contains the most up-to-date information.
- By summarizing the courses from which you can choose to complete your degree requirements, APAS ensures that you stay on track and not take unnecessary courses.
- APAS facilitates advising, allowing less time spent reviewing past course work and more time helping you plan for the future.

General Student Information – This section of the APAS report contains general information on your enrollment and information on your major, minor, and adviser. Some students do not declare majors for several terms and may change their majors several times in the course of their University careers. Once you have declared a major, that information will be added to your report. If you have any holds on your record, they will be listed here along with directions for clearing those holds. Direct any questions about this section or report any inaccuracies to the Registrar's Office, 9 Hill Hall.

Completion Status Line – This section of your APAS report summarizes at a glance whether you have completed your degree requirements. As long as you have some requirements still unmet, this is the message you will see on your APAS report. When you have courses in progress that will complete all requirements, this message will read: PROGRAM COMPLETED IF IN PROGRESS COURSES ARE USED. A final message appears when all requirements have been met: ALL REQUIREMENTS IDENTIFIED BELOW HAVE BEEN MET.

Symbols Used in APAS Reports – This example contains the most frequently used symbols in the APAS report. Requirement symbols indicate whether your requirements are complete:

- (OK) This requirement (including all subrequirements) is complete
- (NO) This requirement is not complete.
- (IP) This requirement is in progress – it will be complete when current coursework is completed.

Under subrequirements, symbols indicate complete (+), no complete (-), in progress (IP), or not required (*).

Course symbols are attached to some of the courses you have taken and indicate how the course is being counted towards your requirements.

On the next page, a sample of several requirement blocks show: how the symbols appear.

5 Requirement Blocks – Your APAS report will have a separate block for each of your degree requirements. Each block begins with the name of the requirement and lists subrequirements. To the left of the title, a symbol tells you whether you have completed that requirement (OK for completed, IP [In Progress] for completed with current coursework, and NO for not completed). Subrequirements also have symbols indicating whether or not they are completed (+ for completed, - for not completed, and ★ indicating that the subrequirement is not mandatory).

All courses that you take to fulfill requirements are listed after the subrequirement with the term, the number of credits, and your grade in the course (or IP for any courses in progress). When any subrequirement is not yet complete, SELECT FROM indicates all courses that can be used to complete the subrequirement.
